(604) 999-0775   joshgg@icloud.com

I am a full stack developer who relishes the opportunity to use my creativity and intuition to build meaningful things. My degree in criminology cultivated a critical thinking mindset which I bring with me to each problem I tackle. I am diligent in my pursuit of a solution, and my professional background in sales and customer service instilled in me the values of communication and collaboration. When I'm not programming, I can be found listening to podcasts, enjoying local theatre productions, or helping my beer league softball team to victory.

TECHNICAL SKILLS

Languages: JavaScript, Python, Ruby, C, HTML5, CSS

Frameworks & Libraries: Node.js, React, Rails, JQuery, Axios, Express, EJS, Flask, SCSS, WebSockets, Socket.io, WebRTC

Databases: PostgreSQL, SQLite

A Buzzfeed-style quiz app for both trivia and personality quizzes.
Front End: JQuery, EJS, Ajax, HTML5, SCSS, Bootstrap
Back End: Node.js, Express PostgreSQL

TinyApp   *October 2020*
A Bitly-style application allowing users to create shortened URLs.
Front End: EJS, HTML5, CSS
Back End: Node.js, Express
Testing: Mocha, Chai

WORK EXPERIENCE

Lumber Trader
Boscus Canada Inc.   *October 2019 - May 2020*

- Prospected new accounts and maintained customer relationships to facilitate repeat business.
- Coordinated with logistics and other traders in both the buying and selling of lumber based on mill, customer, and various reload locations.
- Analyzed lumber market trends to serve as a resource to customers and improve margins based on purchase timing.

Contract Sales
Dick's Lumber and Building Supplies   *August 2017 - October 2019*

- Structured account pricing to the satisfaction customers while also maintaining 20-30% margins.
- Communicated with logistics and other wholesalers to arrange deliveries and non-stock shipments.
- Structured and timed floor package shipments in collaboration with contractors and engineers to maximize site efficiency.
